Agenda

Time	Agenda
09:00–09:20	Opening Session: Welcoming and Introduction
09:20–09:45	Keynotes
09:45–10:45	Presentation of Consultation Outcomes: Key Findings and Insights
10:45–11:15	Coffee Break
11:15–12:30	Panel Discussion: From Consultation to Action – Policy Orientations for ESCI Beyond 2027
12:30–14:00	Networking Lunch
14:00–15:00	Parallel Thematic Sessions
15:00–15:30	Coffee Break
15:30–16:00	Reporting Back and Synthesis of Thematic Sessions
16:00–16:30	ESCI Champions Awards Ceremony
16:30–17:00	Closing Remarks and Next Steps

House Rules

1. **Participate**: Engage actively in discussions and activities. Your input is valuable!

2. **Have Fun**: Enjoy the day, learn from others and increase your network. This will contribute to a productive event!

3. **Collaborate**: Actively use all session tools, including Slido for submitting questions, providing feedback, and participating in polls.

4. **Mobile Phones on-site**: Kindly keep your phones on silent mode during sessions. Don’t hesitate to step outside for calls.

5. **WiFi:** Network: **EC_GUEST**
   Login: **ccab_guest0**
   Password: **ccab_guest0**

3 PRESENTATION OF CONSULTATION OUTCOMES

ESCI Context

Overview of the **European Student Card Initiative (ESCI)**:

Goal	Facilitate **transnational cooperation** and **student mobility** across the European Education Area.
How?	By supporting **digital exchanges, interoperability, cross-border student authentication**, the European Student Card Initiative would **tackle fragmentation** across various systems and standards used in higher education to exchange information, which is a barrier to transnational cooperation.
Vision	Consolidate a European Education Area **where studying abroad** to gain new skills and ambitious transnational cooperation among higher education institutions **is the norm.** Ensure **mobility-related information** flows **seamlessly and securely,** being reused across systems and borders, thanks to digitalised workflows covering the **entire mobility cycle.** Streamline **student status verification anywhere in Europe,** allowing students to access relevant services from day one of their mobility.

3 PRESENTATION OF CONSULTATION OUTCOMES

ESCI Context

This is how **ESCI supports digitalisation and simplification** in Europe's higher education sector:

- **3,000+ higher education institutions** connected to the Erasmus Without Paper Network in **33 countries**
- **300,000+ inter-institutional agreements** and **590,000+ learning agreements** completed digitally
- **280,000+ downloads** of the Erasmus+ App
- **5 million student cards** turned into European Student Cards to date (2 million active) in **25 countries**

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Overview of the consultation

EACEA, supported by NTT DATA, has launched a **large-scale stakeholder consultation** on the European Student Card Initiative (ESCI) to lay the ground work for ESCI+. The goal is to ensure ESCI+ is **a more integrated, user-centric ecosystem** that responds to the needs, experiences and expectations of current and future users and any new requirements from the future Erasmus+ programme.

The **consultation** builds on the feedback already collected in 2025 and the work of the EWP+ consortium and gathers input from a wide range of stakeholders across Europe on the three core components of ESCI - ESC, EWP, and the Erasmus+ App - to **assess their current performance and define priorities for their future development.**

🎯 Specific objectives of the ESCI consultation:

- Establish a **requirements baseline** for ESCI Beyond 2027 based on evidence and stakeholder input.
- Identify **synergies and transition needs** across ESCI components.
- Strengthen **governance** and coordination, proposing pragmatic improvements to decision-making, validation, and stakeholder engagement.
- Plan a realistic **roadmap** (short-, medium-, and long-term) and a monitoring framework to track the adoption and impact of the recommendations.

3 PRESENTATION OF CONSULTATION OUTCOMES

Overview of the consultation

Data collection timeline:

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Overview of the consultation

The consultation involved **9** key activities

1	**5**	**2**	**1**
Large scale survey	Online workshops	In-person workshops	Town Hall (300+ attendees)

23.254

participants engaged in the 9 consultation activities

+33

Countries covered including all 27 EU Member States, EEA Member States and other third countries associated to the Erasmus+ programme.

10

Stakeholder categories addressed

- Students
- Digital Officers
- ESCI Champions
- EWP software providers
- Student service providers
- IT Staff
- International Relations Officers
- Other HEI staff

Please note that the total of 23.254 participants represents the combined number of survey respondents and workshop participants. Workshop figures reflect attendance across all consultation activities; therefore, individuals who participated in multiple workshops may be counted more than once in the overall total.

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

ESCI components are valued across the Community, but their impact has yet to reach its full potential

European Student Card

36%

reported value is clear but not yet realised

The ESC's value proposition is not yet perceived as strong enough to outweigh its implementation effort

Erasmus Without Paper

51%

indicated value is justified or clear in principle

60% face predominantly technical challenges to effectively implement it

Erasmus+ App

65%

say it should be maintained but with significant improvements to strengthen its role

Low awareness and usage limit the app's uptake and impact: 74% of students had never heard of it before the consultation, and 79% do not use it.

Please note that the figures presented throughout the following slides consolidate findings from multiple survey questions and workshop discussions. Since each metric is calculated using different respondent bases, direct comparisons between figures should be avoided. Variations in totals reflect differences in the underlying populations targeted in each question.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

European Student Card (ESC)

Current state (AS-IS)

Desired future state (TO-BE)

General

Although the ESC's core benefits are widely recognised, **there is a clear gap between perceived value and practical implementation,** driven by technical and institutional challenges.

36% of respondents think the added value of the ESC is clear but **not yet realised** in practice.

Integration with the wider ESCI ecosystem and other EU initiatives is perceived as a strategic priority for the ESC's future development.

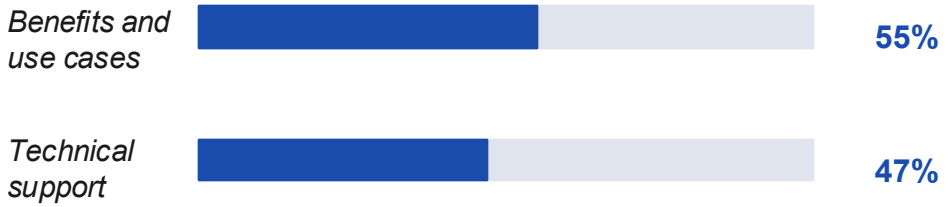

61% of survey respondents (among ESC users) identified stronger integration between the ESC and other ESCI components as the main priority for future development.

Communication & Governance

Communication and accountability challenges still represent an important barrier to ESC adoption, mainly caused by limited awareness, unclear messaging, and fragmented coordination.

Beyond technical and administration barriers, respondents indicate that the ESC is **hindered by** low stakeholder awareness, fragmented communication, weak institutional ownership, misunderstandings of its value, and high coordination demands.

Clearer communication of the ESC's **benefits, use cases and supporting documentation is essential** to drive broader implementation and uptake across institutions.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

European Student Card (ESC)

Current state (AS-IS)

Desired future state (TO-BE)

Processes

Administrative challenges are generally manageable, but **limited staff capacity and coordination issues** continue to hinder ESC implementation.

The ESC is primarily perceived as a tool for **student status verification, service access, and administrative simplification** - with **streamlining of mobility-related procedures** remaining a key expected added value from stakeholders.

Systems & IT

Although awareness of the full range of ESC Router functionalities remains low, **stakeholders recognise significant value in specific features** and integration capabilities.

53% of student service providers consider it important to connect to the **ESC-R** for **checking and validating student status**, highlighting its relevance for verification processes.

Stakeholders strongly support **maintaining both physical and digital ESC formats**, while indicating that the long-term evolution of the ESC is expected to be increasingly digital.

The ESC should evolve into a **digital verifiable credential,** linked to other students' credentials supported by decentralised issuance, enabling flexibility, interoperability and selective disclosure of data.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

Erasmus Without Paper (EWP)

Current state (AS-IS)

Desired future state (TO-BE)

General

Stakeholder perceptions of Erasmus Without Paper remain divided, reflecting **uneven implementation experiences** across the community - which **along with interoperability issues, limits EWP's full potential**.

65% of respondents believe EWP has helped reduce the time spent carrying out administrative tasks

However, others experience interoperability issues, with **60%** of users perceiving technical challenges to be the main type of challenge when using EWP.

Stakeholders increasingly expect EWP to **evolve into a more integrated and interoperable system**, highlighting the need for deeper integration between EWP, institutional student administration systems (SAS), and the Beneficiary Module.

Prioritise seamless interoperability with HEI systems — **79%**

Communication & Governance

Accountability and technical ownership of EWP remain insufficiently clear across the Community.

Governance-related expectations and technical architecture are currently **not entirely aligned**, requiring a more central oversight role to improve validation, testing, and support

Clearer communication, implementation guidance, and transparency in decision making are perceived as essential for future EWP adoption.

Step-by-step **implementation guidance**, technical documentation, and training activities were also repeatedly identified by workshop participants as critical support mechanisms for increasing institutional confidence and EWP adoption readiness.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

Erasmus Without Paper (EWP)

Processes

Current state (AS-IS)

The **digital exchange of Learning Agreements and Inter-Institutional Agreements** remain the most utilised workflows in EWP.

Most respondents exchange **Learning Agreements** (LAs) (82%) and **Inter-Institutional Agreements** (IIAs) (76%) via EWP, while for **nominations** hybrid workflows are more common (34%).

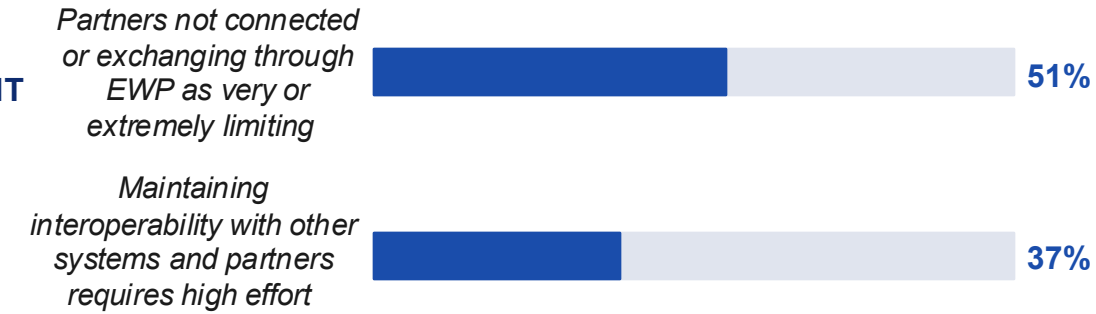

Desired future state (TO-BE)

Process simplification, coordination, and capacity building emerged as the strongest process-related priorities.

Respondents strongly supported **reducing implementation timelines,** improving coordination between HEIs and institutional departments, strengthening staff capacity, and simplifying approval processes.

Systems & IT

The current EWP tool landscape remains fragmented, with **incomplete integration** across **institutional systems** and other Erasmus+ infrastructures.

Seamless interoperability between HEIs, system integration and end-to-end automation emerged as the dominant technical priorities for the future of EWP.

Participants highlighted **Beneficiary Module integration** as a major strategic priority for the next Erasmus+ programme period, together with aligned APIs, shared data structures, and improved data portability across systems.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

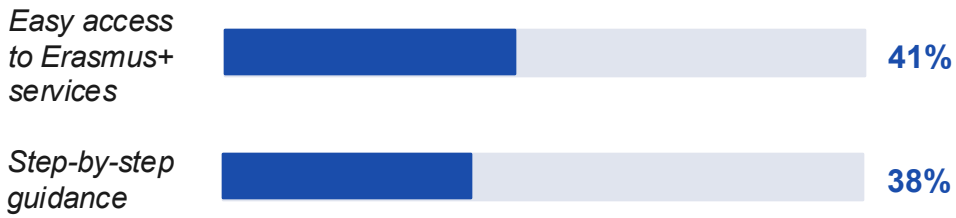

Key Findings and Insights

Erasmus+ APP

Current state (AS-IS)

General

Students see **value in the App's core features,** but adoption is held back by weak institutional integration and low relevance to actual mobility workflows.

Desired future state (TO-BE)

If maintained, the App should evolve into an **integrated mobility component linked to the mobility management system,** rather than remaining an information-only tool.

80%	of Town Hall participants said the App should contribute to a **seamless** end-to-end mobility experience
62%	of survey respondents find that the App could better support HEIs by **integrating** with institutional systems

Communication & Governance

The Erasmus+ App remains **largely invisible at an institutional level**, limiting its potential as a communication and governance tool for student mobility.

10%	of respondents report a significant impact from the Erasmus+ App on how they communicate with students on mobility
43%	of respondents mention the App has not changed how they communicate with students on mobility
51%	of respondents actively promote the Erasmus+ App in their institution or country

Institutions need **clearer communication, documentation, and implementation support** before promoting the Erasmus+ App.

> The Erasmus+ App is not rejected as a concept, however its added value **remains unclear** due to lack of links (or relevance) to existing institutional tools.

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

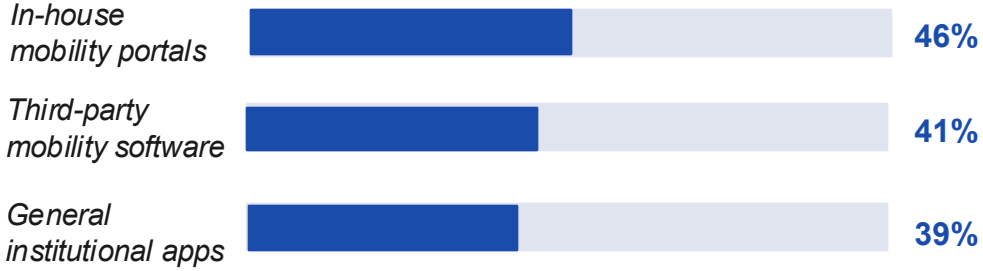

Key Findings and Insights

Erasmus+ APP

Current state (AS-IS)

Systems & IT

The Erasmus+ App's positioning **is weakened by overlap** with the following tools:

Desired future state (TO-BE)

Priority functionalities should focus on **practical mobility management, data reuse and administrative simplification**.

53%	of students with experience using the Erasmus+ App highlighted the **creation, signing, and updating of Learning Agreements** as one of the most desired functionalities
53%	of students with experience using the Erasmus+ App highly valued **integrating the European Student Card within the App** to support student status verification

Processes

Operational clarity around the App can be further improved, according to stakeholders.

38%	of respondents are **unsure** about how to assess the App's current operational setup
53%	of respondents consider it **works either well or adequately** (with some improvements needed)

European Commission

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

Three cross-cutting challenges across ESCI components, but stakeholders remain optimistic about the opportunities to address them.

SYSTEMS & IT

Integration

CHALLENGE

Limited interoperability is a key barrier to unlocking ESCI's full potential.

OPPORTUNITY

- Enable seamless and efficient end-to-end processes across ESCI components
- Support the once-only principle by enabling data reuse and reducing duplicate entries, particularly with the beneficiary module
- Foster greater consistency in implementation and promote interoperability throughout the broader higher education ecosystem to achieve and end-to-end experience

COMMUNICATION & GOVERNANCE

Awareness

CHALLENGE

Limited awareness of the benefits, use cases, and ecosystem role of ESC and the Erasmus+ App hinders broader adoption and engagement.

OPPORTUNITY

- Strengthen communication efforts
- Develop practical resources, such as guidelines and technical documentation
- Provide ongoing implementation support and targeted training to reinforce confidence and drive uptake

COMMUNICATION & GOVERNANCE

Governance

CHALLENGE

Lack of clarity around ESCI governance, overall accountability, and process ownership.

OPPORTUNITY

- Publish clear strategic roadmaps with defined roles and responsibilities
- Provide transparent implementation plans
- Revise, promote and strengthen governance mechanisms
- Foster closer coordination between technical and non-technical stakeholders

3 PRESENTATION OF CONSULTATION OUTCOMES

Key Findings and Insights

ESC EWP E+App

Enhanced integration and interoperability are the key priorities, while the need for **stabilisation and clarity** regarding ESCI+ strategic direction is underlined.

Stakeholder's see value in ESCI integration, but **stabilisation must come first**.

General

Agree with ESCI integration and reuse of data across components

68%

67% of Town Hall participants **prioritised consolidating and stabilising existing processes** over integration improvements.

There is a need for **clarity regarding ESCI objectives, benefits** and strategic **direction.**

Communication & Governance

Participants highlighted that the added value and objectives of ESCI components are **still perceived as unclear** across parts of the higher education community.

Enhancing **interoperability and reducing fragmented processes** emerged as the main technical priorities for ESCI integration.

Systems & IT

There is a strong demand for a more seamless **end-to-end mobility experience**, achievable by better integrating workflows and developing more **integrated, user-friendly systems tailored to the needs of ESCI's main end-users**, notably students and higher education institutions.

62% of respondents believe **integrating EWP student mobility data with the ESC-R** would be beneficial to streamline student verification, processes and mobility services

70% valued receiving **mobility-related notifications** through the Erasmus+ App

67% valued integrating **the ESC within the Erasmus+ App**, accessing **accommodation** guidance and resources, and browsing **course catalogues**

66% valued enabling the creation, management and signing of **LAs**

- Clear & Inclusive Governance

European Commission

5 PARALLEL THEMATIC SESSIONS

ESCI Governance: Towards a Streamlined Model

Through the ESCI consultation, stakeholders consistently highlighted **unclear data ownership and accountability, lack of transparency** with stakeholders across ESCI. In response, we propose a **streamlined ESCI+ governance model** that clarifies roles, strengthens accountability and reduces duplication.

CURRENT STATE: Split Governance

Siloed structures, fragmented decisions and duplication of effort

EWP & Erasmus+ App GOVERNANCE

5 governance bodies

ESC GOVERNANCE

5 governance bodies

1 Digital Officers Forum

! **Silos | Complexity | Duplication**

Transition to integrated governance

WHAT WE PROPOSE: Streamlined ESCI+ Governance

Aligned governance, coordinated decisions and greater impact

ESCI+

INTEGRATED GOVERNANCE

As of 1 January 2027

- **Unified Strategy**
- **Coordinated Decisions**
- **Integrated Oversight**
- **Aligned Accountability**
- **Shared Resources**
